STYLE INSPIRATION

*be inspired by form, function,
colour, texture and pattern*

Style Collaborators

“This unique range of curated colour palettes has been carefully designed to meet the needs of the style conscious consumer – you. These schemes speak to current trends and have been created with longevity and enduring style in mind.

We have used our industry insider knowledge and interpreted what’s happening in the market now as well as looking to the future of residential design.”

Kim Chadwick *Trend Forecast Director*

Kim

“A home really comes to life when you add that third dimension of colour and texture to the floor plan. No matter whether you’re a traditionalist or looking to push visual design boundaries, one of these palettes is sure to perfectly complement your style. In

working on these palettes I visualised our customers and developed suites that would suit their style and lifestyle needs and enable them to use colour and texture to enhance and highlight design elements.”

Zoe Condoleon *Design Specialist*

Zoe

On trend colour schemes

Brickworks has collaborated with trend and design industry professionals Kim Chadwick and Zoe Condoleon to create a selection of colour schemes that will not only inspire, but also give you the confidence to choose the scheme that will make your home perfect.

Our expert Colour Consultants will help you utilise these colour schemes to make exterior colour selections to suit your project.

Visit us at our Design Studio or Centres or go to australbricks.com.au/style-inspiration to find out more.

BENEFITS

of clay bricks

Low maintenance

Clay bricks don't need paint or other treatments to maintain their aesthetics and durability. They are strong, reliable and relatively maintenance free.

Affordable

Brickwork doesn't need painting, rendering or any other coating to preserve its look and durability, making it highly cost-effective.

Expansive colour and profile range

Bricks natural colours and textures enable you to create both striking façade contrasts and more traditional neutral colour schemes.

Energy efficient

Combined with intelligent passive building design elements, clay bricks can help moderate building temperatures and reduce energy consumption.

Absolute strength

Clay bricks are stronger and have a lower rate of absorption than concrete bricks, making them easier to work with.

Brick is sustainable

Made from organic minerals found in shale and local, naturally abundant sources of clay, brick's long-lasting life cycle offers ongoing environmental and health benefits.

TECHNICAL

details

Mortar colour | Mortar finishes

Mortar Colour

Off-white mortar is currently the most popular colour. This is made by mixing light coloured cement and white sand and results in a traditional bricks and mortar look. Mortar can be coloured by adding powdered or liquid pigments to the mortar as it is being mixed by the bricklayer. It can also be tinted to match the brick colour, giving a very even wall colour. Please confirm with your bricklayer what their mortar colouring offering is before making your final decision.

Mortar finishes

There are four common mortar finishes and these various finishes result in different shadow lines on the wall. A raked finish will create a deep shadow in the mortar joint. This brings out the horizontal lines of the brickwork (and the vertical lines to a lesser extent) and it is the most common finish. Rolled and struck joints also create shadow lines, but these are much finer and more subtle. A flush joint doesn't allow shadow lines to form at all, giving the wall a flatter, more unified look. Using a mortar colour to match the brick will take this a step further.

MORTEX

for mortar just add water

Mortex is a factory manufactured, quality assured premixed M4 rated mortar solution. Its consistancy can save labour time, increase efficiency, remove the need for on site blending, and it is compliant with AS3700.

Mortex takes the guess work out of mortar blending and reduces the potential for under strength, non compliant mortar use. This can ultimately reduce potential liabilities, saving money and time on rectifications.

Mortex is a preblended mixture of cement, specially graded sand, lime and admixtures which creates a high quality mortar blend when combined with water.

With the adoption of ISO9001:2008 principles, the mortar constituents are accurately measured and blended in a controlled environment to ensure consistent, homogeneous mortar is produced on-site.

EXP = Exposure grade

Suitable for use in external walls exposed to aggressive environments, such as; areas subjected to salts in the soil, adjacent material or ground water, in coastal areas exposed to attack from windborne salt spray, or retaining walls subjected to fertilisers and ground salts.

GP = General purpose

Suitable for internal and external walls only when above a sheet or membrane damp-proof course and protected by an adequate coping, eaves, roof or similar top covering. These units should not be directly exposed to saline environments.

Solar absorptance rating

In the design of energy efficient buildings, the architects and consulting engineers need to be able to calculate the heat loss or gain of materials used to construct these buildings.

For this reason, our product range has been categorised into three colour groups –
Light (L) < 0.475 Light,
Medium (M) 0.475 - 0.70 Medium,
Dark (D) > 0.70 Dark
to assist architects and consulting engineers with their calculations.

100

*years of vision and
innovation in brick*

Crafting bricks has come naturally to us since 1908.

With a history that extends more than 100 years, Austral Bricks has a proud tradition of 100% Australian ownership and today, Austral Bricks operations consist of 12 factories across six states. We are committed to continuing to inspire and innovate through product and style.

WE ARE

Brickworks

Brickworks Building Products is one of Australia's largest and most diverse building material manufacturers. Under the Brickworks Building Products umbrella are some of Australia's best known building materials brands. Our products include bricks, pavers, masonry blocks, retaining wall systems, precast concrete panels, concrete and terracotta roof tiles, timber products, terracotta façades and specialised building systems.

With a broad product portfolio and manufacturing and sales facilities across Australia, Brickworks Building Products is uniquely placed to service the demands of the building industry.

With over 1,200 staff across Australia and New Zealand, we pride ourselves on our commitment to product, service excellence and our leadership position.
